the best results can be obtained only when the paint is Pure White Lead and Pure Linseed Oil mixed with the requirements of the particular job in view.

Beware of the man who suggests the use of paint already prepared. He cannot know the ingredients of such mixtures.

First-class painting can only be had by the use of paint which contains nothing but Pure White Lead and Pure Linseed Oil, colored to the desired shade. Specify

**COLLIER**  
Pure White Lead  
Made by the Old Dutch Process  
mixed with Pure Linseed Oil, and see that your painter uses it. It spreads easily and uniformly, forming an elastic coat that immediately becomes a part of the wood itself. It will not crack or peel as do adulterated paints. This means attractive appearance and perfect protection through all the long years of its life. When it does wear, it wears away uniformly, and when the painter is called upon again, he finds the surface all ready for him without recourse to scraping and "burning off." Remember the name, Collier Pure White Lead.

Send for a booklet containing several handsome reproductions of actual houses, offering valuable suggestions for a color scheme in painting your house. A test for paint purity is also given.
